

# MYERS DIESEL REPAIR, INC.

Myers Diesel Repair is proud to announce our new BG Inject-A-Flush PF-10 System. The PF-10 is the ultimate diesel injector and fuel additive system for heavy duty diesel trucks. With the PF-10's direct connection to the trucks fuel supply the BG Inject-A-Flush Delivers the exact BG Diesel Care needed to clean injectors fast and efficiently. With BG Inject-A-Flush you will notice better throttle response, improved power and performance. Call today and ask for pricing, specials, or to make an appointment.

## INJECT-A-FLUSH<sup>®</sup> FOR DIESELS

High output diesel engines in trucks are extremely sensitive to deposits that build up throughout the entire fuel system. The smallest amount of deposit build up in injectors can cause reduced fuel mileage, smoke, exhaust emissions and engine clatter. BG 244 is formulated to safely, rapidly and thoroughly remove deposits from combustion chambers, fuel injectors and the entire fuel system. BG 244 cleans fuel systems and lubricates fuel pumps and injectors, restores fuel economy, reduces exhaust emissions, and increases cetane to improve cold starting, to keep your engine running better longer and more efficiently!
